MSECB Client Success Story

DATAPROTECT's journey towards **ISO/IEC 27001:2013**

DATAPROTECT
Security is our **commitment**

MSECB

“

Being a leading pure cyber security company, we had to comply with high standards of information security and quality to strengthen our corporate responsibility and sustainability. The ISO/IEC 27001 and ISO 9001 certifications allowed us to raise our trustworthiness and reliability vis a vis our stakeholders as a cyber security service provider of reference in the region.

– DATAPROTECT

About DATAPROTECT

DATAPROTECT is a leading pure-play cyber security company operating in the EMEA region. The culmination of more than 20 years of experience made it a highly valuable expert striving to meet a 360° vision of cyber security, through strategic consultancy and cutting-edge technical capabilities and services.

DATAPROTECT ensures a complete and a unified cyber security offered to clients through services revolving around cyber defense, offensive security, MSSP & SOC services, secure payments, governance, risk and compliance.

MSECB

Why did you choose to get certified against ISO 9001:2015 and ISO/IEC 27001:2013?

For **ISO/IEC 27001**: To cope with the growth of the company in the recent years, the security of information has become a real concern. The need to protect the company's information and the information of our clients has been set a priority. In addition, operating in the domain of cyber security, we witnessed that security breaches could have serious legal or business continuity implications. Therefore, the decision to get certified with structured and well-defined standards, like ISO/IEC 27001, was a big step towards implementing management policies and procedures that will keep information secure, whatever the format.

For **ISO 9001**: Having customer satisfaction at the core of its business, DATAPROTECT built a framework to ensure consistent quality in the delivery of its services. It has developed a strong customer focus and engagement throughout its relationships with clients. This has come in accordance with the involvement of the top management and the drive for continual improvement to decide on following high standards of quality such as ISO 9001.

What are the main benefits of your company after the implementation and certification against ISO 9001:2015 and ISO/IEC 27001:2013?

For **ISO/IEC 27001**: The ISO/IEC 27001 certification helped us to identify the risks, to assess the implications, and to put in place systemized controls to limit any damages of information breach or loss. Complying with the ISO/IEC 27001 standard improved our clients' and partners' confidence in our security of systems and information and increased our business resilience by being more aligned with our clients' requirements.

For **ISO 9001**: The ISO 9001 certification allowed the company to provide objective proof to employees, partners, and clients that customer satisfaction is at the heart of our business. Overall, leveraging the ISO 9001 standard raised our credibility and our employee engagement and hence it led to a greater operating efficiency and continual improvement culture.

About your experience with MSECB

Over the past years, the audit processes went very well and has allowed us to continuously improve. The auditors demonstrated a high level of proficiency and competence, and their feedback was very relevant and appreciated.

We are very grateful for such collaboration with MSECB.
