BIOS Middle East
journey towards
CSA STAR
Certification

Why did you choose to integrate CSA STAR Certification to your existing ISO/IEC 27001 certification?

— BIOS Middle East is a leading cloud and managed services provider in the UAE, Saudi Arabia, and Oman. Our customers trust us with their data while choosing our cloud services. We have earned our customers' trust while keeping their data secure. Along those lines, we receive quite a few audits and due diligence requests from prospects. Our customers want to make sure that the sensitive data that they give us is secure and protected.

Our main objective in choosing CSA STAR certification, in addition to our existing ISO 9001, ISO/IEC 27001, ISO/IEC 27017, and ISO/IEC 27018 certifications, is to ensure the highest levels of security for our customers. CSA STAR certifications are known as the industry's most powerful certificates for security assurance in the cloud.

Did CSA STAR Certification help to reach you organization's targets?

— Achieving the CSA STAR certification highlights our commitment to providing industry-leading, best-practices security for CloudHPT. It provides trust and assurance that the things we say about our platform are not just an overstatement but that our security and privacy controls are audited by industry experts and third parties that verify whether such controls are implemented accurately.

What are the added benefits that you gained from CSA STAR Certification?

— It enabled us to define best practices that ensure a more secure cloud computing environment and help potential cloud customers make informed decisions when transitioning their IT operations to the cloud.

About you experience with MSECBC

— We are always pleased with MSECBC's meticulous work. Through their expertise, auditors provide a high level of professionalism and diligence. They make the rigorous audit process feel like a smooth process. Furthermore, the precise and relevant feedback that the auditors give us has allowed us to continuously improve our operations.

CSA STAR Certification with MSECBC

— As a Corporate Member of CSA, MSECBC is authorized to provide third-party independent assessments (Level 2 STAR Certification) in conjunction with ISO/IEC 27001 audits.

Level 2 is the most dominant of the STAR levels. It combines the controls and best practices of one of the most widely used information security standard, ISO/IEC 27001, and CSA Cloud Controls Matrix, which is the exclusive Cybersecurity Control Framework that covers all aspects of cloud technology.

Getting CSA STAR Certification brings enormous advantages and added value to organizations since it guides them to follow the requirements for the implementation of best practices and frameworks that bring continual improvement.
