## About E-Settlement Limited

E-Settlement Limited is a financial technology company focused on providing payments and access to financial services in Africa. We have built the pioneering e-payment mobile point of sale solutions in Nigeria, enabling companies and communities to grow in their own way.

Our robust network of agents facilitates secure transactions, money transfers, withdrawals and utility payments for e-commerce, brick and mortar in Nigeria, Niger, Côte d'Ivoire, Burkina Faso, Togo and beyond.

As we grow our agent network to over 200,000 by the end of 2022, we are on a mission to bring financial services in every corner and every street.

Our driving force is improving lives and growing businesses. We work with the belief that we need our customers more than they need us. This has ensured we stay ahead of trends by incorporating valuable feedback that we get from users regarding our products.

We aim to deepen financial inclusion, create jobs, and empower people and businesses.

Our products include:

- Cashenvoy
- PayPad
- PayCenter

## Why did you choose to get certified against ISO/IEC 27001:2013?

Our decision to get certified was based on the fact that as an organization, that meets people's financial needs through technology, we have loads of information in our custody that should be kept safe and confidential.

We did not have any regulatory requirement mandating to get certified with ISO/IEC 27001 standard. However, we needed to ensure that we embed security into our culture and adopt an effective and efficient approach of ISMS in accordance with the standard's best practice. The only way to guarantee this was by getting certified against the ISO/IEC 27001 standard.

*The experience was rigorous and educating.  
The customer service is top notch.*

## Benefits of obtaining ISO/IEC 27001:2013 certification

- Every member of the organization knows that they have a role to play in managing information security and that the task is not for the IT or Risk Compliance functions alone.
- Increased reliability and security of systems and information.
- The implementation and certification of ISO/IEC 27001 standard has improved our risk management and information security.
- Protection against threats.
