GAVI
Journey Towards
ISO/IEC 27001
Certification

By achieving internationally recognized ISO/IEC 27001 certification, a very important and significant accomplishment, Gavi has illustrated its pledge and commitment to information security.

The certification assures partners, donors, and stakeholders that Gavi prioritizes robust security and reliability in its delivery and demonstrates the stakeholder's confidence and trustworthiness through the lenses of an independent third-party certification body such as MSECBC.

Phani Sripada

– Chief Information Security Officer (CISO) at Gavi

About Gavi

Gavi, the Vaccine Alliance, helps vaccinate almost half the world's children against deadly and debilitating infectious diseases.

Gavi has already protected an entire generation of children and is now working to protect the next generation.

By improving access to new and under-used vaccines for millions of the world's most vulnerable children, the Vaccine Alliance is transforming the lives of individuals, helping to boost the economies of lower-income countries, and making the world safer for everyone.

Why did you choose to get certified against ISO/IEC 27001?

Non-profit international organizations being high-profile cyber targets create a distinct challenge for organizations like Gavi since it requires striking an optimal balance between security and maintaining efficient and reliable operations to achieve the mission.

Adherence to the ISO/IEC 27001 international standard provides a management framework to showcase that Gavi is doing everything possible to minimize the ever-evolving cyber risk through a documented system of controls.

Gavi's Information Security Management System (ISMS) is designed to manage and protect data, and systems, minimizing risks and ensuring business continuity in the event of security breaches.

Benefits of obtaining certification against ISO/IEC 27001

By achieving ISO/IEC 27001 certification, we commit to information security while identifying the risks, assessing the implications through systemized controls, and ensuring that our workforce, technology, and processes have met the requirements of these standards to limit any damage that could potentially impact achieving Gavi's mission.

Experience with MSEC B

MSEC B immediately responded to any request and was instantly available to offer their help and support. They have a good understanding of customers' needs and excellent client orientation. The whole MSEC B team maintains a high level of professionalism.

About MSECb

MSECb is accredited by IAS to offer audit and certification services for a wide range of ISO Standards. If you are interested to certify your management systems start by getting a **Free Quote**.
